WHITE HYDROGEN COALITION

We are the White Hydrogen Coalition - WHC, an international association of clean energy tech supporters, whose aim is to accelerate and facilitate the mainstream adoption of the LTC technology, reducing the carbon footprint and waste accumulation, by transforming waste into white hydrogen - the new symbol for clean energy.

Join the clean energy revolution

reimagined on **White Hydrogen Platform.**

The platform powered by Ethereum enables every stakeholder to launch and/or support local projects aimed at setting up LTC power plants converting plastic and municipal waste into white hydrogen to fuel the economy and other materials used in industry.

- Project financing
(Plant Starter program)
- B2B transactions between
producers, distributors and others.
- B2C revenue generation through
project staking

We thus empower individuals to act locally and together we address the biggest problems of our society is “bottom up”.

LTC TECHNOLOGY

FUELING THE FUTURE OF MANKIND

The patented method of low temperature conversion (LTC) enables harvesting white hydrogen and energy from the **municipal waste and plastic**.

Seems too good to be true?
No, as the pilot project is already live.

TOGETHER WE CAN DO

WHAT OUR STATES ARE FAILING TO

In the next 5 years we can build more than 200 LTC power plants across the globe. Just think of what this means for the environment?

- **converting in excess of 1.6 million tonnes of plastic per year**
- **producing more than 230.000 tonnes of hydrogen per year**
- **reducing CO₂ emissions for more than 2.857 million tonnes per year**

A BUSINESS OPPORTUNITY OF THE CENTURY

The total hydrogen economy valuation is projected to exceed 200 billion USD by 2023 and hydrogen is projected to cover at least 25% of total energy needs by 2050.

Return on initial investment in LTC plant is less than three (3) years, producing enough hydrogen per year to fuel 7.500 hydrogen-powered personal vehicles for entire year.

FOR YOU

By purchasing WH2C cryptographic token you become part of the White Hydrogen Coalition and by participation in project you can help to clean up the world. Beside that you can also make profit on the platform, or with WH2C tokens you can trade hydrogen produced on projects we support together.

WH2C SALE

Price per WH2C

from 01.05.2021 - 30.06.2021	Private placement	0.242 \$
from 01.07.2021 - 15.03.2022	Presale	0.254 \$
from 16.03.2022 - 15.07.2022	Public sale (IDO)	0.290 \$ or higher
